Dear Sir or Madam,

We are pleased to announce major changes in the city. These changes are intended to improve the quality of life of our citizens and so have a better organized and healthier city.

For example, connected trash cans will be put in place throughout the city to prevent the overflow of garbage. We would like to inform you that you will have at your disposal some help from the city hall that will allow all users to benefit from these connected trash cans free of charge. Furthermore, we want to reassure you that there will be no additional taxes on these trash cans.

In addition, drones are currently being produced to analyze the areas that need to be cleaned up the most. The sole purpose of these drones is to improve waste collection. These drones are managed by Metropolis for greater safety. We have total confidence in them and have signed an agreement to ensure that these drones are only used for cleaning up the city.

The aim of these changes is to achieve a healthier and better-organized city. Above all, we want to improve the general quality of life in the city in the best conditions. In the next few days, you will receive flyers about the changes that will be made as well as invitations to the open doors of the launches of different products.

Yours faithfully.

Gotham City Hall.
